# Course Overview

Our hands-on training program will help you gain the skill, knowledge and confidence you need to be successful in today's challenging times. Our lecture series will give you a comprehensive overview of Dental Implantology, Soft Tissue Management, Guided Bone Regeneration, Platelet Rich Fibrin (PRF) and Phlebotomy. The implant surgeon will have a more thorough understanding of advanced bone grafting procedures which will ultimately improve implant success, longevity and esthetics for their patients.

## Course Objectives

- ✔ Treatment Planning using Cone Beam CT Technology
- ✔ Step-by-Step Treatment Planning
- ✔ Socket Grafting Procedures
- ✔ Advanced Suturing Techniques
- ✔ Platelet Rich Fibrin to use in Soft Tissue Procedures
- ✔ Immediate Implant Placements
- ✔ Sinus Augmentation (lateral & Crestal Approach)
- ✔ Onlay Grafting
- ✔ Connective Tissue Variation
- ✔ Soft and Hard Tissue Management

*Speaker*

**DR. MIKE E. CALDERÓN, DDS, DABOI/ID, FICOI**

Dr. Mike E. Calderón is the founder & President of the Calderón Institute. He received his DDS Degree from Case Western Reserve University, School of Dentistry in 1994. Dr. Calderón completed the 2-year NYU-CDE Implant and Prosthetic Program where he continued on as an Associate Clinical Professor at NYU for 12 years. Throughout his career he has placed more than 7,000 implants and performed more than 400 Lateral wall Sinus lifts. Dr. Calderón lectures and instructs on all aspects of Implant Surgery & Prosthetics, nationally and internationally. He is a Diplomat of the ABOI as well as the ICOI. He established a private practice in Suffolk County and Nassau County where he provides both advanced surgical & prosthetic phases of Implant Dentistry for his patients.
