## **Immediate Loading for Atrophic Jaws Using Zygomatic & Pterygoid Implants**

**Gulf Medical University – UAE, Dubai**

# *Conference General Agenda*

- ☑ **DAY 1** Flight - Dubai - Burj Al Arab - Jumeira Market
- ☑ **DAY 2** Day one of course at the hotel.
- ☑ **DAY 3** Professional Conference at Gulf University
- ☑ **DAY 4** Free day for shopping or a tour of historic Dubai - Evening flight.

## *Dubai - Who would have believed?*

The United Arab Emirates opens its gates to us and we will not miss this opportunity.

Dubai is the most prominent among the 7 Emirates and famous for its modern architecture which we will concentrate on the upcoming conference. Combining ancient history and culture with boundless modernity, we will be able to admire the preservation of the impressive past with the construction of the breathtaking future.

We will visit colorful markets and ascend to amazing views and experience the local culture in all its components.

***Definitely something to look forward to!***

# ***Our Lecturers***

**Dr. Francesco Grecchi**

MD DDS

**Prof. Samer Srouji**

DMD, PHD

*December 11<sup>th</sup>-12<sup>th</sup>, 2021*

*Interactive 2-Day Cadaver Workshop*

# Immediate Loading For Atrophic Jaws Using Zygomatic & Pterygoid Implants

*Presented by:*

**Dr. Francesco Grecchi, MD DDS | Prof. Samer Srouji**

## Course Description

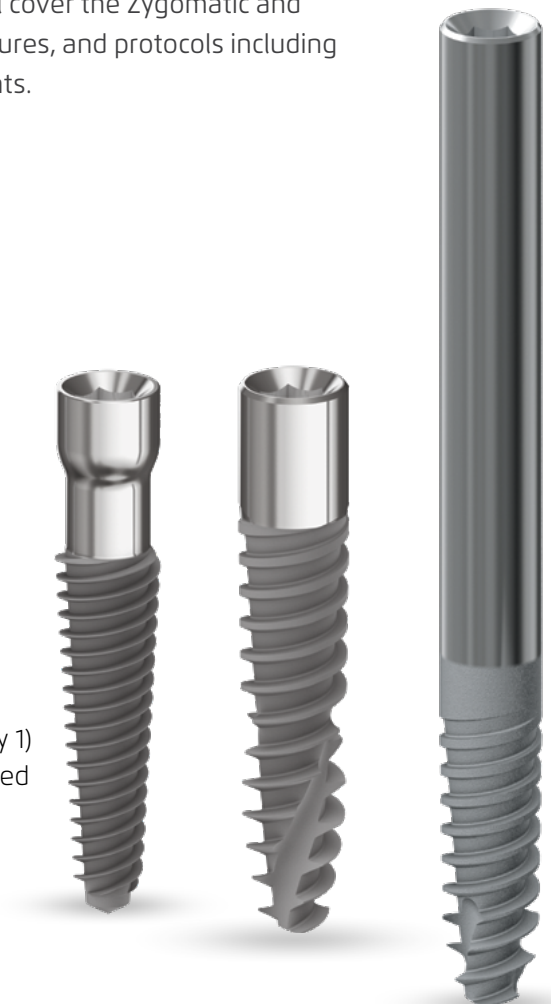

The course will provide a comprehensive overview of advanced full-arch rehabilitations using Noris Medical challenge implant solutions (zygomatic and pterygoid implants).

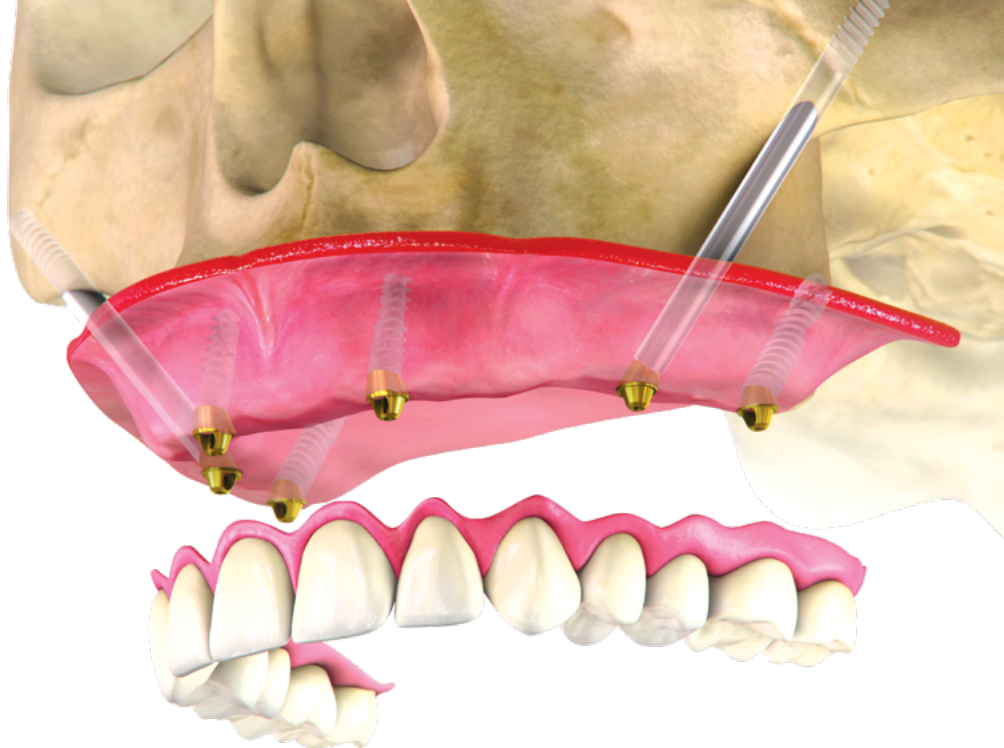

The appropriate knowledge of the topic-related anatomical, functional and aesthetic concepts will allow clinicians to successfully plan and perform such major surgeries.

This course is a comprehensive, detailed, step-by-step lecture that will cover the Zygomatic and pterygoid Implants, surgical and pre-surgical planning, surgical procedures, and protocols including multiple techniques commonly used to place and restore these implants.

## Core Course Topics Include

- ✓ Diagnostic notions for a correct treatment plan
- ✓ Key concepts of surgical anatomy
- ✓ Clinical indications and possible alternatives
- ✓ Extra maxillary surgical approach and immediate loading
- ✓ Complication prevention and handling
- ✓ Full-arch prosthetic aspects
- ✓ Drug protocols for the intraoperative and postoperative stages
- ✓ Hands-on sessions with free-hand technique on mannequins (day 1) and anatomical specimens (day 2) performed by participants backed by clinical tutors.
